

NETWORK STORAGE 2002

The **Network Storage** conference and Trade Show, produced by Peripheral Concepts Inc., is dedicated to analyzing new architectural processes in networked storage and storage management. Launched in 1994 before the terms NAS and SAN were even coined, this yearly conference has led the storage networking industry, offering vendors, users, resellers and investors an opportunity to learn and discuss the various trends and issues facing the storage industry. Over 300 managers and top executives regularly attend this major event every year
